

We are Hiring: Generic Nurse

We are seeking a dedicated and compassionate Ward Nurse to provide high-quality, patient-centered care at the Gruppo San Donato/GKSD Group in Iraq. This role involves delivering comprehensive nursing care to patients across various hospital wards, ensuring their well-being and supporting their recovery. The Ward Nurse will monitor patient conditions, administer medications, and assist in daily activities, working closely with the healthcare team to maintain a safe and comfortable environment for all patients.

Key Responsibilities:

- Deliver general nursing care to patients, including assessments, medication administration, monitoring, and documentation.
- Assist physicians with routine medical procedures and patient examinations.
- Set up and monitor standard medical equipment and devices, such as vital signs monitors, oxygen delivery systems, and intravenous lines.
- Administer medications as prescribed, via oral, injection, or other appropriate routes.
- Monitor patients' responses to treatments and report any changes in condition to the healthcare team.
- Educate patients and their families about health conditions, treatment plans, and discharge instructions.
- Adhere to all relevant standards, regulations, and policies, including infection control protocols and patient confidentiality.
- Participate in ongoing professional development and training, maintaining current nursing knowledge and skills.

Qualifications:

- Bachelor's degree in Nursing (BSN) or equivalent qualification.
- 5 years of nursing experience in a hospital setting, preferably within a general or medical-surgical ward.
- Arabic (written and spoken).
- Good knowledge of the English language (preferred).
- BLS certification required.

Preferred Skills:

- Strong clinical assessment skills: ability to monitor patient conditions, recognize complications, and take appropriate actions.
- Proficiency in using basic medical equipment: familiar with tools such as blood pressure monitors, thermometers, and infusion pumps.
- Effective communication and interpersonal skills: ability to interact with patients, families, and the healthcare team to ensure clear communication about care plans and progress.
- Detail-oriented and organized: skilled in maintaining accurate patient records, tracking treatments, and following care plans meticulously.
- Familiarity with safety protocols and hospital standards: Knowledge of infection control and patient safety guidelines to maintain a safe care environment

Location:

- Iraq.
